## The Description

---

G&H Building Services were appointed to provide the mechanical and electrical services to this new build residential development in Morley, Leeds.

Our scope of works included fit out of landlord areas, car parks, lifts, plant rooms, core areas and external spaces within the site boundary.

We also provided the mechanical and electrical services to the apartment fit out including MCW, DHW, ventilation, sanitaryware, lighting, fire alarms, electric heating and door entry system.

The Project was designed by Hill Lawrence Consultants and we worked closely to ensure all services were installed in a specification compliant manner and to the satisfaction of both consultant and client.
