Project title:

Asda Middleton (New Build)

Location:

Leeds

Client:

Asda

Services:

Mechanical

Main Contractor:

G&H Group nominated contractor

Value:

£400,000

THE BRIEF

Asda, one of our long-standing clients, appointed us as nominated contractor to provide the mechanical services to its new store in Middleton, Leeds.

We were given a tight programme of just eight weeks to have the new store ready and open to the public.

02

OUR APPROACH

Meticulous planning was needed in order to meet the short turnaround time and as nominated contractor we ensured all businesses working on the store were ready and introduced to the site on a rolling basis to avoid any downtime.

We installed a range of mechanical facilities including air conditioning units to offices, warehouse heaters, domestic services, customer toilets and shop floor heating and ventilation.

Energy efficiency measures were at the heart of the works and these link to Asda's energy monitoring system located at its head office.

To meet Asda's fuel reduction targets, our work included a selection of low carbon technologies; air source heat pumps, rainwater harvesting, solar panels and solar thermal.

We met the tight programme thanks to our planning and just in time project management and have gone on to work on more Asda stores since.
