

# CASE STUDY ROCKWELL COLLINS

## HEADLINES

**HIGH  
SECURITY**

high-tech M&E for an approved Ministry of Defence contractor

**70,000** SQ FT

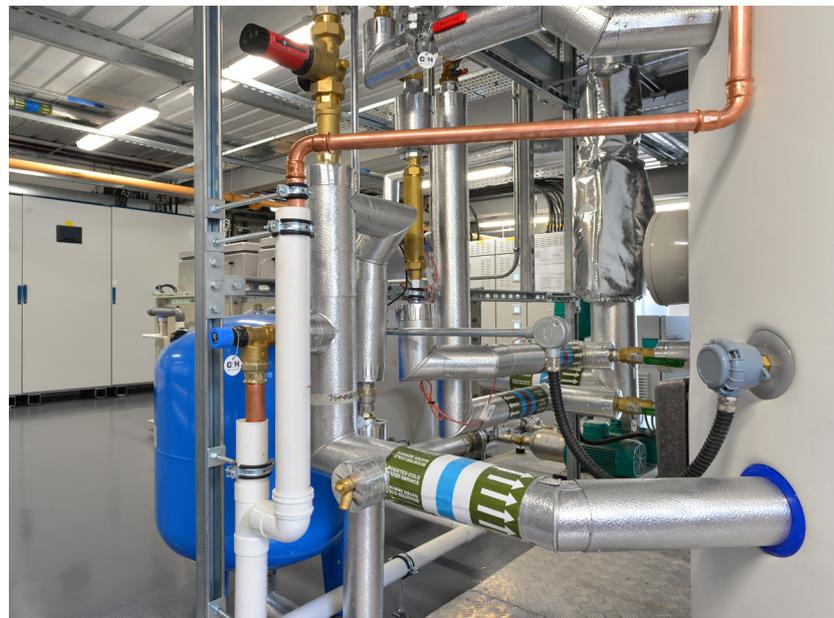

of laboratory and office space redesigned and fitted with M&E

**US COMPATIBLE**

power, voltage and frequency supplies installed

**£2.4M**

category A fit-out in just 26 weeks

## KEY FACTS

Project title: Rockwell Collins  
Location: Reading  
Client: BW Interiors  
Services: Mechanical & Electrical

Contractor: BW Interiors  
Value: £2.4 Million  
Duration: 26 weeks  
G&H divisions: Building Services

# CASE STUDY HOW WE DID IT

This comprehensive category B fit-out project saw us deliver vital, high-tech, high-security M&E for Rockwell Collins – an approved Ministry of Defence contractor and one of the US's leading providers of electronic communications and aviation solutions for Government organisations.

It was a relatively quick scheme that saw us design and rebuild high specification M&E services in a 40,000 sq ft state-of-the-art laboratory and also 30,000 sq ft of office space, all within 26 weeks.

The nature of Rockwell Collins' work meant we had to meet very specific requirements, making sure power, voltage and frequency supplies were compatible with those operating in the US.

Initially, we carried out a comprehensive audit of Rockwell Collins' existing site to gain in-depth knowledge and understanding ahead of the installation.

To meet the pressing deadline we held daily liaison meetings with the main contractor to coordinate works to ensure there was no overlap or delays.

Services included air conditioning, LED lighting and close control temperature systems in server rooms. We also coordinated the installation of the sprinkler and fire alarm systems being fitted by BW Interiors.

## CLIENT REACTION

“Would I use them again? Of course, a good structured company with an old fashioned commitment to client values, and a workforce that is prepared to go that extra mile.”

Mark Davis, Contract Manager BW Interiors
