

# CASE STUDY STEEPER GROUP

## HEADLINES

FULL

mechanical and electrical design and build

MET

a tight deadline of just five months

WORKED

in partnership with the main contractor and client

SERVICES

bespoke to meet office, factory, manufacturing and customer areas

EXISTING

industrial unit converted into a new centre of excellence

## KEY FACTS

Project title: Steeper Group new HQ  
Services: Mechanical & Electrical design and build  
Client: Steeper Group  
Contactor: Sewell Construction

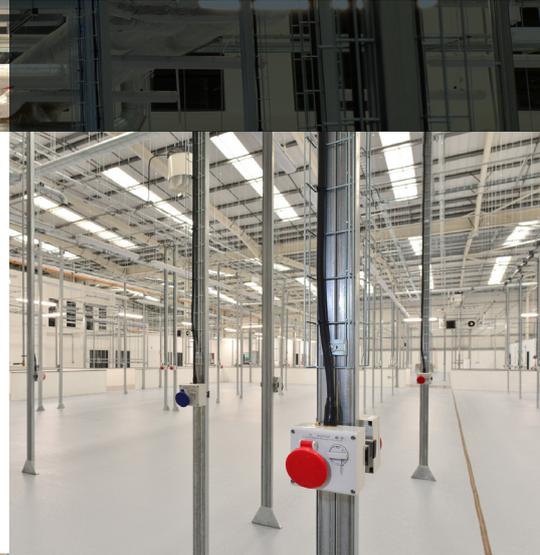

Value: £800,000  
Duration: 20 weeks  
G&H divisions: Building Services

# CASE STUDY HOW WE DID IT

Steeper Group is one of the leading prosthetics, orthotics and assistive technology companies.

It has approximately 110 state-registered clinicians and 194 technicians providing clinical services to some 250,000 patients every year across prosthetics and orthotics.

It is also one of the UK's largest suppliers of orthotic and orthopaedic products to the NHS.

After falling victim to the Christmas floods in 2015, it brought its manufacturing and office headquarters together creating a new, £2 million state-of-the-art facility for 200 members of staff.

Working in partnership with the main contractor, Sewell Construction, we carried out a full mechanical and electrical design and build scheme to convert an existing industrial unit into a new centre of excellence in just five months.

Detailed design sessions at the pre-construction phase saw us working closely with Steeper Group to ensure every part of the facility was bespoke to meet the client's needs and drive efficiencies.

The building services were designed to accommodate the specialist requirements of the manufacturing equipment throughout the space.

The result is a facility that has the best modern day building services that create the perfect environment for Steeper Group to operate in.

The scheme was delivered on time and on budget.

## CLIENT REACTION

"Partnership is a term which is often used in our industry but sadly isn't always backed up with actions however on Steeper our work with G&H represented a true partnership.

"After G&H formed an introduction to the client team on Steeper who were seeking a construction partner, G&H and Sewell worked on an open book basis, developing the costs and design together as part of the project team to achieve an early commencement date.

"The industrial nature of Steeper's new facility meant that all services were exposed and suspended above the working area.

"As such the quality of G&H's installation on site couldn't disappoint and it certainly didn't, delivering a superb building services installation which has truly changed the way Steeper operate as a business."

**Josh Donnelly, Development Manager, Sewell Construction**
