

CASE STUDY FITNESS FIRST, DERBY

STORE | GYM | POOL

HEADLINES

THREE

Week deadline to complete works on time

EXTENDED

Evening and weekend working ensured the deadline was met

WORKED

Considerately around and in coordination with other trades

KEY FACTS

Client: Fitness First
Location: Derby
Services: Small works & Refurbishment to existing M&E facilities

CASE STUDY HOW WE DID IT

As part of the Fitness First rebrand, an extensive refresh of major mechanical and electrical services was carried out at its Derby site by G&H Maintenance.

The planned work was brought forward due to a fire in an adjacent building, which meant we had to prepare and activate our team early to enable an immediate start.

We were given a tight deadline of just three weeks to minimise the time the club was closed.

Due to our organisational skills and commitment, we completed our work on time by working extended shifts in the evenings and over weekends as well as around and in coordination with other trades refurbishing the fabric of the building.

We completely replaced the air conditioning system serving the gym, changing rooms, reception and offices; carried out a full refurbishment of all lighting and power, showers and plumbing; and, service repairs and replacements were made in the main plant rooms.
